Company Certifications : N/A

Usage Overview - Meets LifeCycle Standard

How does the usage of the product impact **Reduction** or **Elimination** ? If there is an impact, is it Low, Medium

Material Consumption : **Yes**

Impact : **High**

Description : Bottled water is expensive, costing the consumer 1,000 times more than water from the faucet. The true environmental cost of disposable beverage bottles is staggering.

Trash Production : **Yes**

Impact : **High**

Description : Americans "use and toss" billions of plastic beverage bottles every year, a small fraction of which get recycled. TAKE BACK THE TAP and refill the same inert, stainless steel Klean Kanteen for years to come.

Toxic Content : **Yes**

Impact : **High**

Description : Polycarbonate plastic, found in most baby bottles, popular reusable water bottles, and large water jugs, contains bisphenol-A, a hormone-disrupting chemical linked to Down's syndrome, early onset puberty, obesity, hyperactivity, and breast and prostate cancer. We are only beginning to understand the threats these chemicals pose to animal and

Energy Consumption : **Yes**

Impact : **Medium**

Description : Over 47 million gallons of oil are used to produce the bottles for water Americans drink each year. And that does not even include the cost to transport bottled water from the manufacturing plant to the store to the consumers home. Cut down on hidden energy consumption simply by re-filling a safe, reusable Klean Kanteen.

Disposal Overview - Meets LifeCycle Standard

Bio-degradable : **No**

Bio-degradable Percentage : **0.0%**

Accreditation : No accreditation

Recyclable : **Yes**

Recyclable Percentage : **100.0%**

Accreditation : No accreditation

Additional Description : None
